

COMMENTS FROM HOLY CROSS COURSE EVALUATION FORM

Class: Economic Growth and Development (two sections)

Date: Fall, 2005

Note: all comments are taken from question #9, which reads: Overall, this course was: Excellent...good...average...poor... very poor. Explain. Eight students answered “excellent,” four students answered “good” and two answered “average.” There were a total of 14 responses.

The comments that follow are *all the written comments* for this question; copies are available upon request from Professor Sánchez.

1. I really enjoyed the topics we covered during the semester. I think that the workload was difficult to handle but has made me a better student;
2. I thoroughly enjoyed this class. Though difficult and a lot of work, this class has ultimately enhanced my capacity to think & how I look at the world. I would absolutely take this class again;
3. This class was not only informative, but at times also entertaining and the teaching style of Professor Sanchez is very good;
4. I would recommend this course to every Economics major;
5. Great guy, tests just too long;
6. Small class (7) = participation mandatory =for good education & challenging. Excellent teaching style!
7. I liked the way most of the course was taught. Small class and the professor would sit right in front of us for discussion, which I liked. Tests need to be reviewed. Two midterms that are 5 hours a piece take up too much time outside of class!
8. The midterms were unnecessarily long. Christmas should be on December 25th every year!
9. The material was very interesting and often eye-opening. The processes by which technology originates and spreads are very interesting;
10. Course was focused too much on what prof's point of view of the world is. It seemed like we rushed through even growth models.
