Dear Colleagues

We are seeking recent graduates for entry level positions in Neuropsychology at Brigham and Women’s Hospital, beginning on or after April 1. Neuropsychology Technicians in the Division of Cognitive and Behavioral Neurology are trained in all aspects of neuropsychological assessment and have the opportunity to gain tremendous experience in a world-class academic medical center, working within our interdisciplinary team, which includes neuropsychologists, behavioral neurologists, neuropsychiatrists, and researchers. Previous testing experience is a plus but not a requirement. Case types cover the entire spectrum and include developmental disorders, epilepsy, multiple sclerosis, Parkinson’s disease, organ transplant, brain tumors, systemic cancers, Mild Cognitive Impairment, Alzheimer’s disease and other neurodegenerative conditions. Our technicians typically go on to medical school or pursue graduate study in clinical neuropsychology.

If you know of a student with an interest in neuropsychology or clinical neuroscience, please encourage them to look into this opportunity by viewing the posting on the BWH website at https://partners.taleo.net/careersection/jobdetail.ftl?job=3012920&lang=en or our Linked-In page at www.linkedin.com/company/brigham-and-women's-hospital.
